SECTORAL STUDY – MACHINERY AND EQUIPMENT	257
SECTORAL STUDY – PLASTICS CONVERSION	336
BIBLIOGRAPHY	392
APPENDIX A – QUALITATIVE INTERVIEWS CONDUCTED	395
APPENDIX B – METHODOLOGY	401

LIST OF FIGURES

Figure 1: Project scope with respect to sectors' positioning within the value chain	15
Figure 2: Scope and segmentation of the metals and engineering industry.....	15
Figure 3. Work packages in the three phases of the project	16
Figure 4: Metals and Engineering share of total manufacturing sales, 1990-2002	19
Figure 5: Contribution of each sector to total metals and engineering employment, 2002	20
Figure 6: Structure of employment in the metals and engineering industry, 1999-2002	24
Figure 7: Changes in employment types, 1999-2002	25
Figure 8: Occupational categories by race, basic metals 2002	26
Figure 9: Occupational category by gender, basic metals 2002.....	26
Figure 10. Percentage of employment accounted for by small, medium and large companies in the Metals and Engineering industries sample, 2002	27
Figure 11: Employers' views on the impact of salary and wages on employment by sector, 2002	41
Figure 12: Impact of the availability of skills on employment creation in the Metals and Engineering industries, 2002	46
Figure 13. Exports as a % of turnover among companies in the Metals and Engineering industries, 2002.....	59
Figure 14. World steel production, 1990-2001.....	72
Figure 15: Predicted growth in domestic and global output, 2001-2006 (ABSA 2002)	73
Figure 16: Official employment trends from 1990–2002.....	75
Figure 17: Employment trends from 1999 – 2002 within the basic metals sector	76
Figure 18. Type of services outsourced among small, medium and large companies.....	79
Figure 19: Number of employees by work category	80
Figure 20: Number of employees by gender.....	81
Figure 21: Turnover during 2002 by organisation size – basic metals	84
Figure 22: Index of production volumes.....	85
Figure 23: Sector exports 1990-2002	86
Figure 24. Exporting and non-export employers' views on the need for change in various factors to facilitate growth	87

Figure 25: Exports' contribution to turnover	88
Figure 26: Balance of trade, 1990-2002	88
Figure 27: Export destinations for small organisations in 2002	89
Figure 28. Export destinations for medium sized organisations in 2002	89
Figure 29. Export destinations for large organisations in 2002.....	90
Figure 30: Investment within the basic metals sector (GFCF: 1990 – 2000).....	91
Figure 31: Job champions and losers by organisation size	92
Figure 32: Breakdown of workforce profile among job champions and losers	96
Figure 33: Perceived importance of various drivers of growth among job champions and losers	96
Figure 34. Perceived need for change with respect to export market and competitor intelligence in the basic metals sub sector	100
Figure 35. Difficulty experienced when accessing appropriate skills (expressed as a % of the total sample)	102
Figure 36: Respondent's view on whether the Merseta is effective.....	103
Figure 37: The extent of organisations considering workforce reductions in the short-term (1 year)	105
Figure 38: Basic metal's sector perception of turnover growth to 2005, by organisation size	106
Figure 39: Employers' perceptions of the impact of salary and wage costs on employment creation	112
Figure 40: Predicted growth in domestic and global output, 2001-2006	120
Figure 41: Total employment trends by industry from 1990 to 2002	125
Figure 42. Employment trends from 1999 to 2002 within the electronics and electrical engineering sector	126
Figure 43. Type of services outsourced among small, medium and large companies.....	131
Figure 44. Breakdown of workforce profiles by race within the electronic engineering sub- sector	132
Figure 45. Breakdown of workforce profiles by race within the electrical engineering sub sector	132
Figure 46. Breakdown of the workforce profiles by gender within the electronic engineering sub sector	133
Figure 47. Breakdown of the workforce profiles by gender within the electrical engineering sub sector	133

Figure: 48 Trends in real sales from 1990 to 2002	134
Figure 49. Turnover during 2002 by company size – electronic engineering	135
Figure 50. Turnover during 2002 by company size – electrical engineering	135
Figure 51. Index of production volumes (in constant 1995 units)	136
Figure 52: Trends in real exports from 1990 to 2002.....	137
Figure 53: Exports of electrical machinery and equipment.....	138
Figure 54: Exports as percentage of total sales	138
Figure 55: Exports contribution to turnover electronic engineering	139
Figure 56: Exports contribution to turnover electrical engineering during 2002	139
Figure 57: Real import trends from 1990 to 2002	140
Figure 58. Real balance of trade trends from 1990 to 2002	141
Figure 59. Absolute change in employment versus % change in employment from 1999 to 2002	143
Figure 60. Contribution to job creation among job champions, by company size	144
Figure 61. Percentage contribution to overall employment in the electrical and electronic sample, by company size	145
Figure 62. Relative importance of factors inhibiting competitiveness between job champions and job losers.....	145
Figure 63. Breakdown of workforce profile among job champions and job losers within the electrical and electronic engineering sub sector.....	152
Figure 64. Perceived need for change with respect to export market and competitor intelligence	157
Figure 65. Perceived need for change with respect to innovation of products among the electrical and electronic sub-sector	159
Figure 66. Perceived need for change with respect to innovation of products among small, medium and large companies.....	159
Figure 67. Perceived need for change with respect to labour legislation in the electronics and electrical sector	161
Figure 68. Difficulty experienced when accessing appropriate skills (expressed as a % of the total sample)	161
Figure 69: Respondent's view on whether the Merseta is effective.....	162
Figure 70: The extent of organisations considering workforce reductions in the short-term (1 year)	163

Figure 71: Predicted growth in domestic and global output, 2001-2006	184
Figure 72: Employment performance in light and heavy engineering versus other sectors..	186
Figure 73: Employment in the heavy and light engineering sector, by industry (in '000s) from 1990-2002.....	186
Figure 74: Employment trends from 1999 – 2002 within the heavy and light engineering sub- sector	187
Figure 75: Employment in building and construction	189
Figure 76. Type of services outsourced among small, medium and large companies.....	192
Figure 77: Survey employment categories by race for the automotive components.....	193
Figure 78: Survey employment categories by race in the metal product and fabrication category	193
Figure 79: Survey employment categories by gender for the automotive components category	194
Figure 80: Survey employment categories by gender in the metal product and fabrication category	194
Figure 81: Sales trends within the heavy and light engineering sub-sector, 1990-2002	195
Figure 82: Index of production volumes (1995=100)	196
Figure 83. Export levels in the heavy and light engineering sector, by sub-sector from 1990 to 2002	197
Figure 84: Exports as percentage of total sales from 1990 to 2002	198
Figure 85: Exports' contribution to turnover for the metal products and fabrication sector ...	198
Figure 86: Exports contribution to turnover for the automotive sector.....	199
Figure 87: Domestic sales in the heavy and light engineering sector, by sub-sector from 1990- 2002	199
Figure 88: Imports, 1990-2002.....	201
Figure 89: Balance of trade, 1990-2001	202
Figure 90: Investment trends within the light and heavy engineering sector (Constant R Million, in 1995 value terms).....	203
Figure 91: Automotive industry capital investments, 1993-2001	204
Figure 92: Job champions and losers by organisation size	205
Figure 93: Job champions and losers by profitability.....	206
Figure 94: Job champions and losers by export propensity	208

Figure 95: Job champions and losers by skill level.....	211
Figure 96: Job champions and losers by drivers of growth	215
Figure 97: Perceived importance of various factors in facilitating growth, by job champions and job losers.....	218
Figure 98. Perceived impediments to job creation by job champions and job losers	219
Figure 99: Perceived importance of various factors in facilitating growth, by small, medium and large companies	220
Figure 100: Small, medium and large companies' view on the accessibility and cost of various factors on their competitiveness	221
Figure 101. Exporters and non-exporters' views on the need for change in various factors to facilitate growth	222
Figure 102: Perceived need for change in information regarding export markets.....	223
Figure 103: Perceptions regarding skills availability	226
Figure 104: Respondent's view on whether the Merseta is effective.....	226
Figure 105. Value chain for machinery and equipment production	271
Figure 106: Predicted growth in the domestic and global output of machinery and equipment and other transport equipment from 2002-2007	273
Figure 107. Employment in the non-electrical machinery sub-sector, 1990 – 2002.....	278
Figure 108. Employment the transport equipment industry from 1990 – 2002.....	279
Figure 109: Employment trends from 1999 to 2002 within the machinery and equipment sub sector*	280
Figure 110. Employment contribution by company size 2002	281
Figure 111. Type of services outsourced among small, medium and large companies.....	282
Figure 112: Survey employment categories by race	284
Figure 113: Survey employment categories by gender	285
Figure 114: Production volumes trends of non-electrical machinery and transport equipment (1995=100)	285
Figure 115: Turnover trends from 1990 to 2001 in machinery and transport equipment	286
Figure 116: Industry profitability by size of organisation.....	287
Figure 117. Real growth in fixed capital stock for metal and engineering, 1990 – 2001	288
Figure 118. Import penetration trends from 1990 to 2002 of the machinery and equipment sector compared to the overall metals and engineering industry	289

Figure 119: Exports as percentage of total sales in the non-electrical machinery and other transport equipment industries	290
Figure 120. Relative indexed performance of the real value of exports for the machinery and equipment sector compared to total metals and engineering industry and total manufacturing, 1990 – 2002 (1990 = 100)	291
Figure 121. Percentage of employees in exporting and non-exporting companies in 2002..	291
Figure 122: Export destinations for small companies in 2002	292
Figure 123. Export destinations for medium-sized companies in 2002	292
Figure 124. Export destinations for large companies in 2002.....	293
Figure 125. Value of trade in and trade balance for, non-electrical machinery, 1990 – 2001 (Constant 2000 R Millions)	294
Figure 126. Transport equipment - value of trade and trade balance, 1990 – 2001 (Constant 2000 R Millions)	295
Figure 127. Proportion of employment accounted for by job champions and job losers, 2002	296
Figure 128. A breakdown of the costs of production in the manufacture of machinery and equipment	297
